

QUALITY POLICY

COLORQUÍMICA, S.A. is a company specialising in the formulation and production of pigment pastes and powder dispersions. We have a pointer laboratory that makes custom colors from a sample or develops new colors together with our customers adapting to their needs. We are a company dedicated to the manufacture of dyes and pigments made to measure, both in paste and powder, of application in various plastic materials.

The maximum precept of the quality policy COLORQUÍMICA, S.A. is the satisfaction of the client at the lowest cost, trying to respond at all times to the expectations and requirements of our stakeholders and ensuring the profitability of the company.

Our management system based on the UNE-EN-ISO 9001 has been designed in order to adapt to the changing requirements of our internal and external context by means of continuous improvement of products and services and the reduction of the defects identified in these.

The deployment of quality policy to each department of the company ensures that it is properly understood and effectively implanted in the daily work, and creates a framework for establishing and tracking the objectives and goals of our Organization.

It is the desire of the company to allocate all the necessary resources so that the quality policy of our company is understood, realized and taken into account by all the members of the company, at all the levels of the organization and known by our Stakeholders.

Andreu Blasco Janè
